Fahruraji -

Software Developer at PT Perkebunan Nusantara 4 Head Office
| Co-founder Oassyst.com | Computer Science at Medan State
University | Milk Enjoyer
South Jakarta, Jakarta, Indonesia

Summary

Software Developer | Frontend (Vue.js) & Full-Stack (Laravel) |
Python Automation | UI/UX-Oriented | Co-Founder @ Oassyst.com |
Comfortable with Linux & Deployment

I'm a Computer Science graduate from Medan State University with over 6 years of experience in software development. I've worked across various sectors from government institutions to my current role in a BUMN (state-owned enterprise) delivering digital solutions that are both practical and user-focused.

My main focus is frontend development with Vue.js, backed by a solid understanding of UI/UX principles. I also work as a full-stack developer using Laravel, building complete web applications from front to back.

Beyond development, I enjoy automating workflows using Python, and scripting with tools like Lua to streamline processes. I'm also comfortable working in Linux environments, and I often handle my own app deployments from setting up servers to making sure everything is production-ready.

As the co-founder of Oassyst.com, I build tools and platforms that help businesses operate more efficiently and effectively.

Key Skills:

Vue.js, Laravel, JavaScript, HTML/CSS, Python, Lua, REST APIs, Git, UI/UX, Linux, Basic DevOps, Automation, Full-Stack Web Development

Experience

PT. Perkebunan Nusantara IV (Persero)

Officer Data Support - Software Developer

June 2025 - Present (1 year)

South Jakarta, Jakarta, Indonesia

IMPHNEN

Senior Scroll Analyst

January 2021 - Present (5 years 5 months)

Jakarta, Indonesia

Diskominfo Kab. Serdang Bedagai

Software Engineer

March 2024 - May 2025 (1 year 3 months)

Serdang Bedagai Regency, North Sumatra, Indonesia

As a Web Engineer at Diskominfo Kab. Serdang Bedagai, I am responsible for a broad range of activities that ensure the effective operation of web applications across the region. My key responsibilities include:

Designing: Creating intuitive and user-friendly web interfaces to enhance user engagement and satisfaction.

Developing: Writing clean, efficient, and scalable code to build robust web applications that meet the diverse needs of the community.

Testing: Conducting comprehensive testing to ensure the functionality, security, and performance of the web applications are up to the highest standards.

Deploying: Implementing web applications across various platforms, ensuring seamless integration and deployment.

Maintaining: Providing ongoing support and maintenance to ensure the web applications are up-to-date, secure, and fully operational.

In my role, I play a critical part in developing and maintaining the digital infrastructure that supports the operations and services of Kabupaten Serdang Bedagai, contributing to the overall efficiency and effectiveness of our digital services.

Cowalaid

Frontend Web Developer

October 2022 - January 2024 (1 year 4 months)

Medan Petisah, North Sumatra, Indonesia

Experienced Frontend Web Developer with a focus on team collaboration, proficient in handling HTTP requests, utilizing Tailwind CSS and ES6, and implementing JWT authentication.

At Cowalaid, I contribute to the seamless integration of design and functionality, working closely with UI/UX and backend teams to deliver exceptional web experiences. I excel in handling RESTful APIs, AJAX, and asynchronous programming, ensuring efficient data exchange and optimal user experiences.

Using Tailwind CSS, I create visually appealing and responsive user interfaces that enhance the overall user experience. Leveraging the power of ES6, I write modern and efficient JavaScript code for scalable and maintainable web applications.

To ensure secure authentication and data protection, I implement JSON Web Tokens (JWT) in my projects, maintaining the integrity and confidentiality of sensitive information.

Collaborating with cross-functional teams, I actively participate in discussions, provide valuable insights, and seamlessly integrate frontend components within the overall system architecture.

Dicoding Indonesia

Student of SIB x Dicoding Batch 4 (Front-End and Back-End Developers)

January 2023 - July 2023 (7 months)

Freelance

Freelance Developer

January 2019 - August 2022 (3 years 8 months)

In my freelance journey, I have successfully delivered fullstack website applications, utilizing my expertise in frontend and backend development. From designing user-friendly admin dashboards to creating visually appealing landing pages, I strive to provide tailored web solutions that meet my clients' specific requirements. I also ensure seamless communication between the frontend and backend systems through the implementation of robust REST APIs.

Alongside my web development endeavors, I have nurtured a profound interest in game modding. This has allowed me to acquire in-depth knowledge of game mechanics, asset manipulation, and creating engaging modifications that enhance the gaming experience.

To augment the functionality of the websites I develop, I have integrated Telegram bots, enabling users to conveniently interact with the platform, receive notifications, and access information through the messaging platform.

Throughout my freelance career, I have not only acquired valuable technical skills and experience but also fostered meaningful connections. Collaborating with clients, fellow professionals, and the wider community has enriched my professional growth and provided valuable insights.

Education

Universitas Negeri Medan

Bachelor's degree, Computer Science · (June 2020 - June 2024)
